

A little thing can mean a lot

SHARPAK™ VisiLOCK™
PATENTED

At long last – a sharps container that clearly indicates when the closure is locked and safe for disposal.

SHARPAK™ VisiLOCK™ PATENTED

The increased importance for infection control and safe disposal of used sharps has continued to develop throughout the world - and we are a leading supplier to this market with the SHARPAK range.

We have always been at the forefront in the research and development of new products to meet the demanding daily needs of clinical staff, both within and outside the hospital environment.

Following the development of the SHARPAK PLUS range of containers we have continued to design innovative and cost effective improvements to make these products safer and easier to use.

One of the major criticisms of ALL sharps containers on the market today is that none of them provide a clear means of indicating when the closure is fully locked - until now that is!

In line with this need, we have developed a simple lock indicator system called **VisiLOCK**.

VisiLOCK takes the form of a simple spring-loaded injection moulding which is inserted into the closure during assembly. **VisiLOCK** is only actuated when the closure is turned to the 'fully locked' position - the result being that the top of the indicator is clearly visible, even from a distance.

VisiLOCK is now a feature on the SHARPAK Compact (0.5 litres), SHARPAK 18 PLUS (1.58 litres), SHARPAK 35 PLUS (3.5 litres), SHARPAK 60 PLUS (6 litres), SHARPAK 120 PLUS (12 litres) and SHARPAK 220 PLUS (22 litres) containers.

Patented and trademarked by Nolato.
