

# Environmental Policy

Inpress Plastics Ltd is manufacturer of The Sharpak™ range of sharps containers, custom made components requiring technically refined moulding methods and primary plastic packaging to the medical, pharmaceutical, healthcare and Industrial sectors.

Our mission is "To be a socially responsible organisation, manufacturing products for the medical and industrial sectors, for the benefit of our stakeholders and local community."

A key way to achieve this is by operating an Environmental Management System (EMS) in accordance with the requirements of ISO 14001:2015. Our plants shall therefore comply with the requirements of this standard. In this way, we can ensure that our environmental work is managed in a systematic and goal-oriented manner.

Environmental performance is important to all of us, and we are committed to contributing towards sustainable development. Our overall objective is that Inpress' environmental impact shall be as limited as possible. Measures aimed at reducing our contribution towards global climate change are important to both Inpress and our business partners.

- We shall actively promote adherence to the Inpress5 values. Through our environmental targets we will actively contribute to the fulfilment of Inpress' Sustainability Targets.
- We shall report our environmental and sustainability performance annually
- We shall review, track and monitor our compliance to current environmental legislation and all our compliance obligations.
- We shall use our Environmental Management System to continually improve our environmental performance.
- We shall conserve energy, natural resources, and take environmental and health-related aspects into consideration when choosing raw materials, chemical products and distribution methods.
- We shall minimise waste and emissions from our operations and maintain sound emergency procedures by systematically evaluating the risk of accidents, fires and uncontrolled emissions to the environment, and taking appropriate actions to prevent pollution and reduce our impact on climate change.
- Whenever we make changes to processes, plants and products, we shall take the opportunity to introduce continual environmental improvements.
- We shall strive to use environmentally-sound technologies, materials and packaging when we develop new products.
- We shall wherever possible introduce our business partners to life cycle thinking and the impacts of our aspects and activities.
- Our environmental performance against our compliance objective shall be evaluated on an on-going basis by taking measurements, recording deviations and carrying out audits.

We shall provide open and objective information about our environmental work, both externally and internally. In accordance with this policy commitment and the requirements of ISO 14001:2015, our environmental policies operating procedures and work instructions have been integrated with the site Quality Management Systems.

Commitment to this policy is Company-wide. The policy and the Environmental Management System will be monitored and reported by the Quality and Process Manager

Copies of this Policy Statement, ISO 14001 Certificate and EMS Scope are available to interested parties on request.
