

Simply use Sharpak Zero sharps containers to reduce your carbon footprint

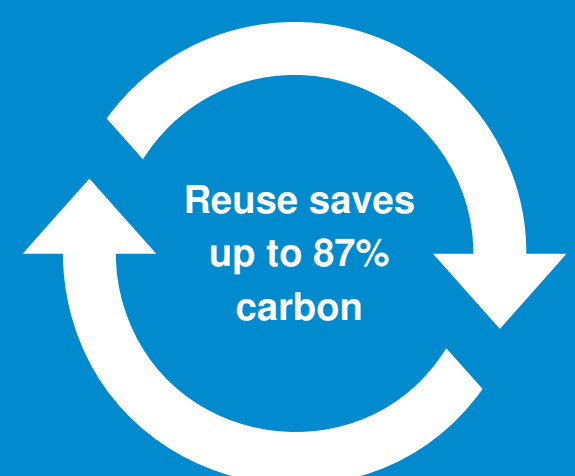

Eradicating plastic creation, manufacture, and incineration of a Sharpak Zero container saves up to 87% of the carbon footprint of a single-use container*

After 10 uses the same material can be re-used to make a new container 10 times - as they are used 10 times, the material is used for 100 container cycles without ever impacting quality or safety

Using Sharpak Zero sharps containers is proven to help reduce your carbon footprint
